

STANDS FOR EVERY MACHINE

Stands are available: Knocked Down (KD) - assembly required, Fully Assembled or Fully Assembled with sewn-off head.

Overview of Sewing Machine Stands

Parts of a stand: 1. The Legs ("K" leg, T-leg, "H" leg)
2. The table. 3. The motor (& on/off switch) 4. The foot treadle. 5. Links for the foot treadle.
6. Accessories (pedals, knee lift, lights, accessory drawer, etc.)

One cannot put a sewing machine on just the legs. What is needed is a "Complete" stand setup. The table is usually cut out with a pattern that fits the specific machine that one is putting on the stand. The motor must be placed in the correct position so the pulleys of the motor and machine line up and a belt can connect them. Below the table there can be a treadle with a rod connecting it to the motor or an electronic pedal switch controlling the motor depending on which type of motor you are using. There may also be a knee pad lever for foot lift or other switches depending on the type of machine and what control functions it has.

In addition to the basics that comprise a working COMPLETE STAND, there are many accessories available including: lighting, thread holders, measuring tape, etc. "K" leg, T-leg, "H" leg, Sunken and Space-saver stands available assembled or knocked-down (you assemble.) We have "Complete Stands" that come with all the necessary basics: the legs, table, motor, switch, pedals. We have the appropriate stand for your machine! Tell us what machine it is for and what you need to sew and we will tell you what stand and accessories you need.

STANDS FOR EVERY MACHINE

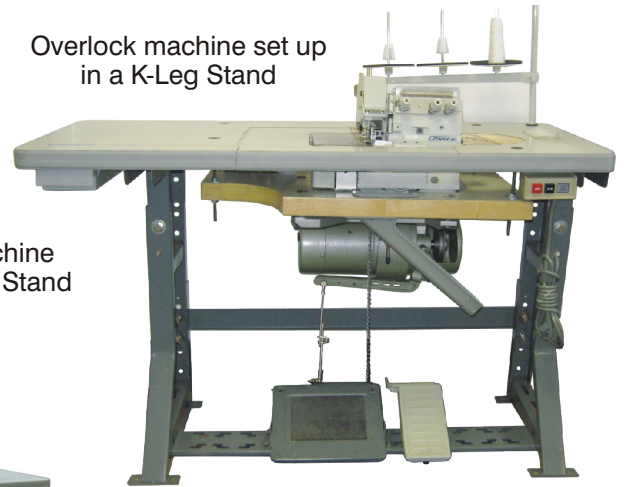

Stands are available: Knocked Down (KD) - assembly required, Fully Assembled or Fully Assembled with sewn-off head.

(note: "Sewn-off" just means someone sewed a small piece of fabric to confirm that the machine is sewing)

30" long arm sewing machine in a extended table H-Leg Stand

Overlock machine set up in a K-Leg Stand

Heavy-duty cylinder bed machine shown set up on Space-Saver Stand

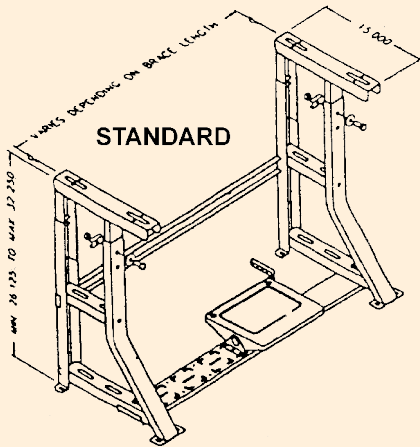

Sewing machine in a K-Leg Stand

Casters may be installed on stands (A T-Leg stand shown here with casters)

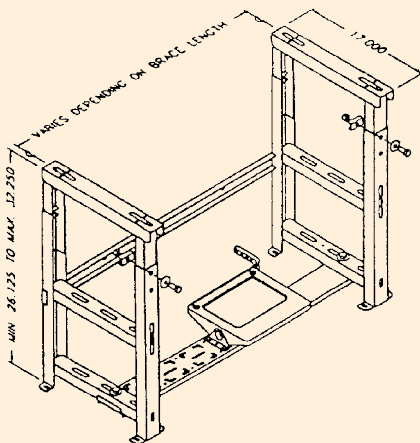

These are just some examples of popular stands. Call for your specific stand needs. Also available: Legs, Tables, Motors, Switches, Belts, Lights, Thread Stands, etc.
