

Servo Motor CSM5003

Automatic Footlift, Reverse and Needle Position Synchronizer capable
1.35 HP (1000 Watt) Brushless Servo Motor
Energy Efficient – Saves up to 70% Electricity

Featuring:

- Powerful 1.35 HP (1000 Watt) Specially made for Extra-heavy duty machines
- Comes with Footlift outlet
- Comes with Reverse outlet
- Adjustable Soft-Start Feature
- Needle Positioning
- Uses the same mounting holes as a clutch motor
- **No Noise** when machine is not running
- **No Vibration** when machine is not running
- **Draws Minimal Electricity** when machine is not running
- Ultra High Torque D.C. Electronic Servo Motor, single phase
- Easy to adjust speed & motor direction with digital controls
- No clutch disc / No brushes
- Adjustable belt tightener
Belt guard, pulley & mounting hardware included
- Light weight

CSM5003 Servo Motor - Complete Setup
(Includes power cord and plug)

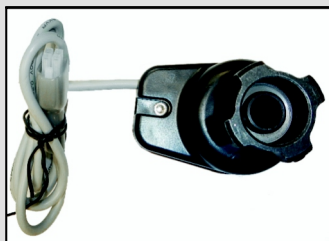

View of the rear of the controller unit.

These motors are perfect for machines such as the Consew 733R series as they are able to run the add-on automatic foot-lift and reverse features.

Needle Positioner (Synchronizer)

Note:
Motors works with or without Synchronizer.

MOTOR FEATURE SELECTOR

CSM5000 Just Motor

CSM5001 Motor with Synchronizer and Needle positioning

CSM5002 Motor with Synchronizer and Needle positioning and Footlift outlet

CSM5003 Motor with Synchronizer and Needle positioning and Footlift outlet and Reverse outlet

Voltage: The 5000's are 110 VAC
The 6000's are 220 VAC
