Instructions & Parts List

CONSEW INTERNATIONAL LTD.

Yamajin Bldg., 18, 1-chome, Hon-machi, Higashi-ku, Osaka 541, Japan P.O.Box: Osaka Higashi No. 509

Telephone: Osaka 261-3291 ~3297 (7 Lines) Cable Address: "CONSEWMACH" Osaka Telex: J64459 CONSEW

Fax: (06) 261-3298

Instructions

Consew Cutters are precision tools, made by master craftsmen.

In order to maintain this precision and the adjustments which are essential to satisfactory operation of your cutter, it is important to conscientiously follow these instructions.

1. Starting

Connect the cord supplied to machine terminal and then to the electrical outlet. Prior to operating the machine rotate the rotor hand pulley by hand. If pulley rotation is difficult, please refer to Item (4) below.

2. Cloth Presser Adjustment

To adjust the height of the cloth presser and fit the cloth to be cut, lift the shaft knob while lightly pressing down on the brake lever.

3. Knife Sharpening

Lift the cloth presser to its highest point and then sharpen the edge of the knife by hand with the emery stone. When sharpening the knife do not shave the stand and knife slide.

Important Note:

Before doing any work on the machine, be sure to disconnect the machine from the electrical outlet.

4. Knife Installation

To change the knife, unscrew the knife lock screw with the box wrench and take the knife out. Prior to installing a new knife clean the stand groove and knife slide with the cleaner. It is recommended to use oil to achieve a cleaner stand groove. Make sure the knife lock screw is tight before starting the machine.

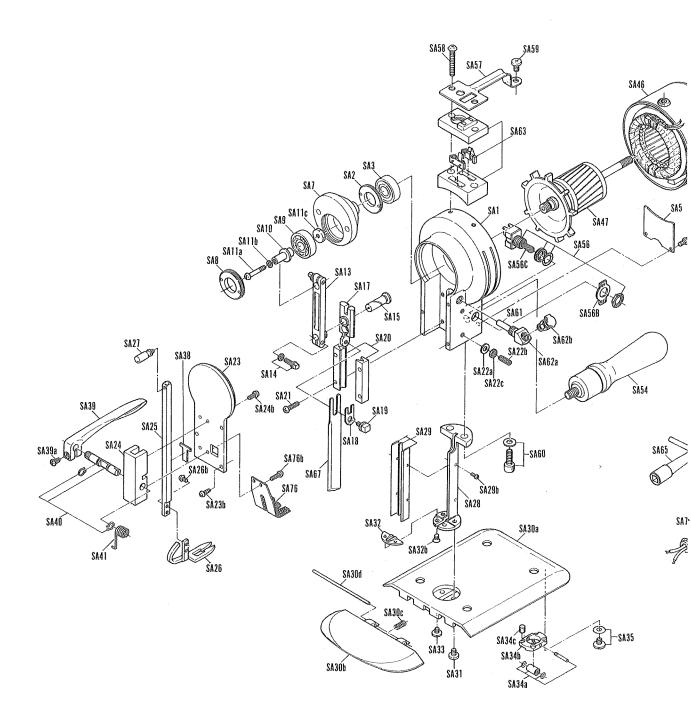

5. Other Precautions

Occasionally, dust or lint will become trapped on a contact point of the stator base which may cause difficulty with starting the machine. In this case remove the dust from the contact point.

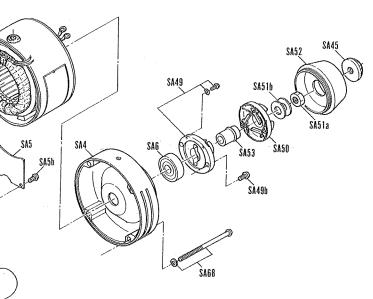

The machine requires a minimum of lubrication. Periodically, oil should be supplied through the oil cup. In order to lubricate all necessary parts after oiling, rotate the rotary hand pulley by hand, and switch the machine on and off intermittently. Oiling should also be done during the first week of operation of a new machine, and when the machine has been idle for a period of time.

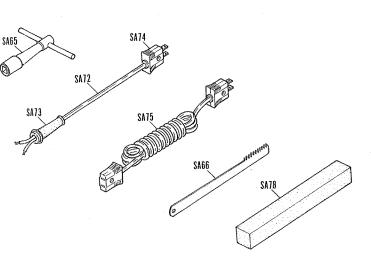

Keep the machine clean by removing all accumulations of lint, thread and cuttings.

Parts List (510)

Part - No.	Part Name	Q'ty	Part No.	Part Name	Q'ty
SA1	Motor front cover	1 pc.	SA6	Ball bearing (#6200 ZZ)	1 pc.
SA2	Bearing cover	1 pc.	SA7	Balance	
SA3	Ball bearing (#6200 ZZ)	1 pc.	SA8	Bearing cover	
SA4	Motor rear cover		SA9	Ball bearing (#6200 ZZ)	
SA5	Switch plate	1 pc.	SA10	Crank pin	
SA5b	Screw	2 pcs.	SA1 1a	Screw	1 pc.
