

# CUTTING MACHINES **CONSEW** Since 1898

## PORTABLE ELECTRIC ROTARY SHEAR **Model MB-50-C**

The **MB-50-C** is a lightweight yet powerful rotary shear that lets you cut fabric with incredible ease and accuracy. The MB-50-C is excellent for narrow curves and sharp corners. For cutting single and low lays of material including cloth, knitted fabrics, plastics, synthetics, leather, lace, fiberglass, vinyls, etc. Use for slitting and trimming knitted fabrics when base plate is removed.

### Features:

- Grip-style Switch Bar - automatically stops when NOT pressed.
- Fast, accurate Scissor Action Cuts - ensured by carbide blade.
- No fusing or "pull in" of materials.
- 7-Sided High-Speed Steel Blade - easy to change and longer lasting.
- Built in sharpener. • Impact Resistant Casing.
- Removable base plate - allows "off the table" operations such as slitting.
- Shock Protection - double insulated against electrical shock.
- Long lasting ball bearings - easy to lubricate and maintain.
- 10 Ft. electrical cord with additional safety switch.

### MB-50-C Specifications:

|                      |                               |
|----------------------|-------------------------------|
| <b>Weight</b>        | - 21 ounces                   |
| <b>Blade Size</b>    | - 1-7/8"                      |
| <b>Cutting Depth</b> | - 7/16" (Max.)                |
| <b>Electrical</b>    | - 110 V.A.C.                  |
|                      | (220V on Special order basis) |

## PORTABLE ELECTRIC ROTARY SHEAR

## Model 503K

Model 503K is a lightweight yet powerful rotary shear (scissor action) that lets you cut fabric with incredible speed. It comes with built-in sharpener and safety features.

The 503K is excellent for narrow curves and sharp corners. For cutting single and low lays of material. Used for slitting and trimming knitted fabrics when base plate is removed.

### Model 503K Features:

- Lightweight and Powerful.
- Grip-style Switch Bar - automatically stops when NOT pressed.
- Fast, accurate Scissor Action Cuts - ensured by carbide blade.
- No fusing or "Pull In" of materials.
- 6-Sided High-Speed Steel Blade - easy to change and longer lasting.
- Removable base plate - allows "off the table" operations such as slitting.
- Impact Resistant Casing.
- Shock Protection - double insulated against electrical shock.
- Shielded Ball Bearings - require no lubrication or servicing and ensures free and quiet operation.
- Features a worm gear drive for efficient, effortless operation.
- Built in sharpener.

### Model 503K Specifications:

|                              |                                                                               |
|------------------------------|-------------------------------------------------------------------------------|
| <b>BLADE TYPE</b>            | Hexagonal Knife                                                               |
| <b>BLADE SIZE</b>            | 2" (50mm)                                                                     |
| <b>CUTTING DEPTH</b>         | 9/32" (7.2mm) Maximum                                                         |
| <b>WEIGHT</b>                | 19 ounces (540 gr)                                                            |
| <b>ELECTRICAL</b>            | 110 volts AC<br>50 Watt Motor<br>(220 volts available on special order basis) |
| <b>ELECTRICAL CONNECTION</b> | 6-1/2-foot line cord with standard plug                                       |
